Experience

- 2016-2017 (current) - **Ruby on Rails Developer**

  Ruby on Rails Developer at PDVEND Working as a Rails Developer and using Agile methodologies. In this position I have the following responsibilities:

  1 - Gather requirements for the website.

  2 - Address the modifications needed on the PDVend platform.

  3 - Develop features for the website.

  4 - Create tests using Rspec, Cucumber and Capybara.

  5 - Improves in restful API.

- 2015/2016 - **Ruby on Rails Developer**

  Ruby on Rails Developer in Noosfero project. Working as a Rails Developer and using Agile methodologies. In this position I have the following responsibilities:

  1 - Gather requirements for the website.

  2 - Address the modifications needed on the Noosfero platform.

  3 - Develop features for the website.

  4 - Create tests using Rspec, Cucumber and Capybara.

  5 - Improves in restful API.

- 2015 - **Google Summer of Code**

  Organization: Debian Project

  Assigned mentors: Antonio Terceiro

  Abstract: The project goal is to create a tool that will be able to install and configure Web applications. The user will interact with the tool through a web application to allow the use of such functionalities. We will have a backend that will receive the information provided by the user, so getting installed and configured application. Soon say goodbye to complicated settings! This would help many people mainly the responsible for the systems infrastructure.
